

It's 7:30 AM in Columbia, and Chris Evans, a senior computer science major, is getting ready to leave for his 8 AM class. He knows parking on campus fills up fast, so he opens the CamPark app to check for available street parking nearby.

Chris sees a few open spots highlighted near his building. The app even shows real-time updates, helping him pick the closest available space. He quickly plans his route and grabs his keys.

By 7:45 AM, Chris arrives and easily finds the open spot the app showed him. No circling, no stress — just a quick park and a short walk to class.

Chris makes it to his 8 AM lecture with time to spare, feeling confident and prepared. Thanks to CamPark, he starts his day smoothly instead of scrambling for parking.

Sean, a junior business major at USC, has a meeting with his group project team at 9 AM. Running a little late, he worries about finding a parking spot near the library.

He quickly opens the CamPark app and sees live updates of available street parking close to the library. A spot just opened up two blocks away!

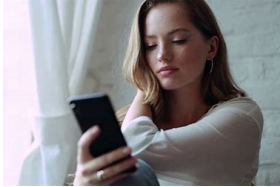

Sean heads straight to the spot without wasting time circling around. He parks easily and grabs his laptop, relieved he won't be late.

Thanks to CamPark, Sean makes it to his group meeting right on time, ready to focus instead of stressing about parking.

Joan, a communications professor at USC, has an early 7:45 AM lecture to teach. She knows morning parking around campus can be a nightmare, so she opens the CamPark app before leaving home.

CamPark shows her several available spots close to her building. She picks the best one and sets out with confidence, knowing exactly where she's headed.

Joan arrives on campus and parks smoothly without circling or rushing. She even has a few extra minutes to grab a coffee before class.

Thanks to CamPark, Joan starts her morning calm and prepared, ready to give her students her full energy without parking stress.

Ricky, a senior fashion design student, has a big presentation today showing off his latest clothing line. He's carrying garment bags and needs a close parking spot to avoid a long walk.

He opens the CamPark app and quickly finds an open street parking spot right near the design building. It's exactly what he needs with all his materials.

Ricky drives straight to the spot, parks with no hassle, and carefully unloads his designs. No last-minute stress, no worrying about being late.

Thanks to CamPark, Ricky walks into his presentation confident and composed, ready to impress his professors and classmates.
